

East Morgan Holdings, Inc. Shareholder Letter Update

East Morgan Holdings, Inc. (OTC: EMHI) EMHI today announces a clarification of press release dated June, 17, 2011

Fort Lauderdale, Florida ([PRWEB](#)) January 04, 2012 -- East Morgan Holdings, Inc. (OTC: EMHI) EMHI today announces a clarification of press release dated June, 17, 2011

EMHI has a joint venture partnership agreement with Global Technologies Group, Inc. who in turn has teaming agreements with MSE Technology Applications (MSE) Butte Montana (www.mse-ta.com) and M2 Polymer Technologies, Illinois (www.m2polymer.com).

The results of these agreements as set forth in the June 17th 2011 Update to Shareholders is as stated.

About East Morgan Holding Inc.

The Company intends to focus its operations on pollution prevention from metal contaminated air emissions from manufacturing plants and on energy products containing heavy metals. The Company's technologies are proven in the remediation of metals in coal combustion gas emitted from coal fired plants, also the Company's technologies have proven capable of eliminating highly toxic mercury and other metals from the ash and waste water which are byproducts from coal fire plants.

The above transaction is subject to and contingent upon all Federal and State regulatory approvals. The foregoing discussion contains forward-looking statements, which are based on current expectations. Actual results, including the outcome of demonstration results, timing and amount of revenues recognized contracts awarded and performed and net income may differ due to such factors as: delays in payment on contracts due to specifications; economic and other conditions affecting the ability of prospective clients to finance projects; and other risks generally affecting the financing of projects. Investors are cautioned to perform a proper due diligence and consult-licensed professionals prior to making an investment decision.
